Color Hints: Best of the Best Best Arrows for Best for Ultimate Best for Traditional Best for Crossbow Positive Feature

Elaboration:

Number of Positive Features: This value equals to the sum of all the green marked features for an item. For every product, there are some positive (marked green) and negative (marked red) features. We summed up all the green marked features to calculate this value.

Rating Frequency: This value indicates how frequently a product is receiving every 10 ratings on Amazon.com. This gives an idea of how frequently a product is getting sold on Amazon. Usually, one of every 10 persons that purchases a product rates it. A lower value here means the product is getting sold at a faster rate. All these data were as of 30th May, 2019.

Blank/White Boxes: The boxes that are white indicate that we didn't find any mention of those features anywhere on the internet for those products when we conducted our research. We couldn't come to a conclusion about those features when we personally tested them as well. So we left them blank/white.

Average Rating: The average rating it has out of 5 on Amazon.com till 30th May, 2019.

Total reviews: The total number of ratings/reviews it received on Amazon.com till 30th May, 2019.

P.S. For some points where positive or negative features can't be determined easily (e.g. rating frequency or price), we took an average value and made everything that is equal or above that value green and anything lower than that red.
